RE: JPA Funding for Air Traffic Control Tower

Dear Mr. Wixstrom:

This is a request for an emergency JPA to provide funding for the construction of an Air Traffic Control Tower at the New Smyrna Beach Municipal Airport.

The City Commission has been concerned about air safety at this airport because of the high daily operations. The 1995 mid air here that resulted in three fatalities and the 1999 mid air at Deland Municipal that killed four individuals have made it crystal clear that controls must be applied if air traffic is going to move safely in and out of New Smyrna Beach Municipal Airport. Last year the Commission directed me to make application to FAA for a Contract Tower. Attached is the latest data from FAA showing New Smyrna Beach as having a 1.16 "B/C" Ratio. That figure qualifies this airport for a 100 % funded manning of the tower. We must now get the tower built.

The latest JACIP for this airport requests ATC Tower funding in FY 2002. We now request that that be moved up to current year funding and that this project become our number one (1) priority for an Eight (80/Twenty (20) % AIP Grant. This project will be on a fast track. To that end, we will be using the same consultant and same tower design currently under construction at Space Coast Regional Airport, saving considerable time in the planning stage.

Your favorable response to the above urgent safety project is respectfully requested.

Sincerely yours,

Ron Wilsbach  
Airport Manager

Cc: Frank Roberts, City Manager  
John Hagood, Asst. City Manager  
Richard Owen, FAA  
Brian Pendleton, AEC  
Joe Johanson, Chairman AAB
